

REMARKS

Present Status of the Application

The Examiner's indication of allowance of claims 1-4 is noted with great appreciation, if rewritten to overcome the rejections under 35 U.S.C. 112, second paragraph and the objections, set forth in the outstanding Office Action. Accordingly, Applicant has amended the claims 1, 3-4, integrating the subject matters of claims 1-4 in a proper format in compliance with the U.S. Patent practice and canceled claim 2 without prejudice or disclaimer, in order to expedite an early allowance of the above-identified application.

Furthermore, new claims 5-7 have been added including the allowable subject matters, and therefore the newly added claims 5-7 are also in proper condition for allowance.

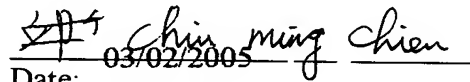

Furthermore, the specification has been amended to correct some grammar and typographical errors. As suggested by the Examiner, a corrected substitute specification and the Marked_Up version thereof are submitted as separate accompanying pages. Reconsideration is respectfully requested.

For at least the foregoing reasons, Applicant respectfully submits that claims 1 and 3-7 are in proper condition for allowance and reconsideration of this application is respectfully requested.

CONCLUSION

For at least the foregoing reasons, it is believed that all the pending claims 1 and 3-7 of the present application are in proper condition for allowance. If the Examiner believes that a telephone conference would expedite the examination of the above-identified patent application, the Examiner is invited to call the undersigned.

Respectfully submitted
